

## **BG-EHS Applied Skills Workshop**

The five (5) day in-person ASW is a cross-over course. It is the final stage of the BioGeometry personal development curriculum, following the BioGeometry Foundation (FT) and Advanced Foundation (AT) Trainings.

The ASW is also the prerequisite course for the BG-EHS Licensed Independent Associate- Practitioner Training.

The ASW builds on the BioGeometry applied skills acquired at the FT and AT classes, and introduces students to more advanced tools, techniques and protocols that enable them to apply the BG applied skills set with increased accuracy, efficiency and effectiveness. It brings the BioGeometry personal development curriculum full-circle with focus on the five pillars of the BG / BG-EHS applied skills set, and empowers students to be able to individually develop that skills set to maximize the utility of their BioGeometry knowledge in their daily lives. This applied skills set is the foundation for successful BG-EHS work, and it is fully covered in the ASW.

Please note that the ASW is not a BG-EHS license training course, and does not license students for any commercial BioGeometry / BG-EHS work.

## **BG-EHS Applied Skills Workshop**

The ASW curriculum includes:

- BG3 Centers Solutions: Identification and utilization of environmental BG3 centers (micro power-spots in the home) for more powerful BG3 centering solutions.
- BG-EHS Holistic Reprocessing Pyramid (HRP) Framework: A completely BG3-based approach to fully harmonize environmental energy-quality disturbances within a structured and objective framework, with clear benchmarks & controls and confirmations.
- BG-EHS Protocol 3 Pendulum (P3Pendulum): Quick and accurate measurement of higher levels of BG3, without any direct engagement of energy-quality disturbances at all.
- BG-EHS BG3-Based Earth Gridlines Surveying System: Accurate, efficient, and a fully BG3 measurement-based system for Earth gridlines surveying.
- BG-EHS Doorway Discs: Complete BG3 environmental home harmonization using the energy-keys of the doorways.

Completion of the BG Advanced Foundation (AT) Training, and being in good standing with regards to the BG Student Agreement, are prerequisites for attendance of the BG-EHS Applied Skills Workshop.

Students need to only bring their BG Quality Measurement (BGQM) tools with them to the workshop (BG16, IKUP, Horizontal & Vertical Dials Pendulums, and the Human Archetype Ruler).

Tuition for the ASW differs by region, based on different overheads / logistics costs. Tuition includes a student package of BG-EHS tools (P3Pendulum, Doorways Discs Pack, BG3 #7 Strip Stickers Pack, Hartmann/Benker & Curry Earth Gridlines Discs Packs) valued at USD\$310.
